Dmitri Manajev

Robotics & AI Engineer | RL | Product-Minded Builder
Zurich, Zurich, Switzerland

Summary

Robotics / Reinforcement Learning engineer based in Zurich, with over a decade of experience shipping production software across AI, robotics, mobile, web, and other complex systems.

My recent focus is ROS 2, C++, Python, and deployable robotics systems, including navigation, manipulation, evaluation workflows, and practical integration on real robots. I enjoy turning ambitious technical ideas into working systems that are maintainable, testable, and grounded in real-world constraints.

Alongside hands-on engineering, I bring founder and product/tech leadership experience, with strong ownership across architecture, delivery, and execution.

Open to Robotics / AI roles and collaborations in autonomy, reinforcement learning, robot software, and deployment-focused engineering.

Website: manajev.com

Experience

Hivebotics
Robotics Systems Engineer
May 2026 - Present (6 months)
Zurich, Switzerland

Building robotics software for Hivebotics across navigation, manipulation, autonomy and Physical AI.

Manajev AI Labs
AI/RL/Robotics Specialist
January 2023 - Present (3 years 10 months)
Zurich, Switzerland

https://manajev.com

Applied AI and robotics work focused on reinforcement learning, ROS 2, C++, and Python, covering policy deployment, navigation, manipulation, and sim-to-real workflows

CryptoApps Manajev

Founder / Software Engineer
June 2018 - December 2024 (6 years 7 months)
Zurich, Switzerland

• Built and shipped full-stack decentralized applications on Ethereum and Tron using Solidity, Node.js, and Vue.js/React.js.
• Worked on smart-contract security, testing, and audits for blockchain applications.
• Developed automated transaction systems and execution infrastructure for high-throughput environments.
• Optimized blockchain node infrastructure for performance, latency, and cost.

Swissmeda AG

4 years 2 months

Product & IT Manager
December 2015 - May 2018 (2 years 6 months)
Zürich Area, Switzerland

• Led the software engineering team, including backlog planning, one-on-ones, project coordination, and delivery processes.
• Drove documentation and automation of core company products and internal workflows.
• Planned and executed migration from legacy tools and infrastructure to modern engineering tooling, including GitHub, Jira, Confluence, AWS, and Linux.
• Designed and managed AWS-based cloud infrastructure to support product development and operations.

iOS Senior Software Engineer
April 2014 - November 2015 (1 year 8 months)
Zurich, Switzerland

Design and architect multi branded iOS application smop: download and view implant planning cases on iPad and iPhone, browse 3D data and slice views, review case information and approve planning. Staging & Deployment with Fastlane.

SpotMe

Senior Software Engineer

January 2013 - January 2014 (1 year 1 month)

Lausanne

"Making events happen."

Full Stack Software Engineer.

Design and architect of interactive custom application features: voting, photo sharing, checkin, games, surveys, data visualisation, conference and etc. - both on backend and mobile web core.

Communication skills in working with project managers / development several projects in short time.

Technologies: Node.js, NoSQL, CouchDB, Backbone, HTML 5, CSS 3, d3, nginx.

Lanit-Tercom

3 years

Mobile Software Engineer

March 2012 - December 2012 (10 months)

Saint-Petersburg

Development of Mobile(iOS, Android and Windows Phone) applications.

Software Engineer

June 2010 - May 2012 (2 years)

Contributer of FOSS project.

UI and backend development for a networking solution that remotely manages, configures and calibrates all analytical FOSS instruments.(C#, WPF)

www.foss.us

Have worked at Redmine project.

Development of flexible project management web application which includes a gantt chart, calendar, wiki, forums, multiple roles, and email notification.(Ruby, Ruby on Rails)

Software Engineer Intern

January 2010 - May 2010 (5 months)

Project GREENi.

Development of web application, social network for golfers.

www.greeni.com

Education

Saint Petersburg State University

Master of Science, Mathematics and Computer Science · (2007 - 2012)
