English (Native or Bilingual)
Mandarin (Native or Bilingual)

Certifications

ROBO2x: Robotics: Vision Intelligence and Machine Learning - EdX
A*STAR Managerial Development Program
Introduction to Self-Driving Cars - Coursera
Learning Docker

Publications

Digital Manufacturing: Key Elements of a Digital Factory
Obstacle avoidance for a mobile rehabilitation robot

Kendrick Chin

Head of Engineering at Hivebotics
Singapore

Summary

PMI-certified and Chartered Engineer (Systems Engineering) with a strong foundation in robotics and software development. I bring a unique combination of technical expertise and structured programme management, enabling the successful delivery of complex, cross-functional initiatives in fast-paced, innovation-driven environments.

With deep experience in mobile robotics, computer vision, and intelligent automation, I have consistently delivered value by aligning technology roadmaps with business goals, managing multi-disciplinary teams, and mentoring emerging talent in the field.

I am passionate about transforming ideas into deployable solutions —driving progress through operational excellence, innovation, and collaborative leadership.

Experience

Hivebotics
1 year

Head of Engineering
September 2026 - Present (2 months)
Singapore

Lead Robotics Engineer
November 2025 - September 2026 (11 months)

Singapore Armed Forces (SAF)
13 years

Platoon Commander (411 SAR)
January 2016 - Present (10 years 10 months)
Singapore

Reservist

Achievements:
NSMEN Execellence Award - 2017
NSMEN Execellence Award - 2018
NSMEN Execellence Award - 2019
Letter of Commendation - 2019
NSMEN Execellence Award - 2020
NSMEN Execellence Award - 2021
Armour Officer Advance Cource (AOAC) 24/22 - 2022
NSMEN Execellence Award - 2023
NSMEN Execellence Award - 2024

Lieutenant
November 2013 - January 2016 (2 years 3 months)
Singapore

Platoon Commander of the Mortar Company during 41 Singapore Armour Regiment's(SAR) 10th mono intake.

Attended:
Officer Cadet Course (94/14)
Field Artillery Officer Cadet Course (61/14)
41SAR Army Training Evaluation Course (Recon 2A)

A*STAR - Agency for Science, Technology and Research
7 years 6 months

Technical Lead
September 2022 - November 2025 (3 years 3 months)
Singapore

Led several project teams comprising up to 9 developers from different domains to deliver projects spanning up to 3 years. Drove the topic of heterogeneous fleet management, supported proposal development under MTC-IAFs.

Industry Partners: IHI, M8M, Omnimold

Notable Programme contributions:
Supply Chain 4.0 - Warehouse Control Platform
https://www.a-star.edu.sg/supplychain4/artc-supply-chain-4-innovation-themes/smart-warehouse-nextgen-logistics/warehouse-control-platform

M8M Joint Lab

https://www.linkedin.com/posts/artcsg_joint-labs-launch-with-m8m-mencast-mirxes-activity-7137336814935146496-ZSuG?utm_source=share&utm_medium=member_desktop

RMF 2.0 – Enabling Large Scale Implementation of RMF for Cross-Sectorial Applications

Senior Development Engineer
April 2021 - September 2022 (1 year 6 months)
Singapore

Mobility - Mobile robot fleet management

Industry Partners: NCS, KA Industrial Engineering

Contributed to projects on the topic of Mobility - Mobile robot fleet management & Mobile Manipulation. Led project team on ambiguous projects adopting agile project approach on the implementation of Artificial Intelligence for multi-agents and Software Development Life Cycle.

Developed and commissioned a system for medical diagnostic testing, BRAVE™ . https://www.a-star.edu.sg/News/astarNews/news/covid-19/stronghold-diagnostics-lab-boosts-national-capacity-for-covid-19-testing

Achievements:
A*STAR Sponsorship awardee 2022
A*STAR Firefly Awardee 2021

- Project: Stronghold Diagnostic Lab (SDL)
Award: Borderless Award – Gold

-Project: Diagnostics Lab Automation for COVID-19 Testing (BRAVE/RAVE)
Award: Innovative Policy/Project Award – Gold

Development Engineer, Advanced Robotics Applications, ARTC
June 2018 - April 2021 (2 years 11 months)
Singapore

Advanced Robotics Applications

Industry Partners: Rolls Royce, SAESL, P&G

Developed process specific automation on Aerospace components. Includes down-selecting system components for various assembly applications. Applied datumn-ing algorithm for industrial robots as well as integration of external sensors. Setting multiple concurrent TCP/IP communications between different systems to facilitate information transfer.

Constructed plugin between customised functions between AMR and AGV fleet managers using C++ & Python. Done documentation of code as well as static analysis, code coverage and unit tests. Experienced with feature detection on 2D vision, showing pick and place on board a mobile manipulator platform using ROS.

Achievement:
Main contributor of a Technical Disclosure of an assembly process on MRO part.(2019)
SPOT award (Aug 2019)
SPOT award (Oct 2019)
SPOT award (Dec 2020)

Freelance / Contract / Self-Employed
Robotics Instructor
September 2019 - May 2022 (2 years 9 months)

VEX IQ Coach

2019/20 Square Away
- Judges award

2021/22 Pitching In
- Team champion award
- Robot skills award
- VEX Worlds Inspire award (represented Singapore)

PBA Group - Robotics & Automation
Lidar navigation software engineer
February 2021 - January 2022 (1 year)

Contributed to the building of tech stack of AMR and Fleet Manager.

- Revamped navigation & software modules using ROS.
- Integrated IMU, EKF filter, robot diagnostics, LIDAR safety sensor.

- Developed interface for log retrieval, schematics of logs database and log analysis tools.
- Implemented CI pipeline using Azure DevOps.

THE BRAINERY CODE
Lead Instructor
October 2015 - June 2018 (2 years 9 months)

-Provisioning of LEGO EV3 Mindstorms and NXT teaching and Coaching Services.
-Coordinate with Branch Manager on all logistics and teaching arrangement.
-Monitor and document student's progress
-Provide brief report to the Branch Manager on lessons conducted.
-Conduct competition trainings for NJRC and Robocup

Student achievements:
1st place Robocup 2016
1st place Robocup 2017
1st place Robocup 2018

Education

Nanyang Technological University
Master of Science - MS, Artificial Intelligence

Nanyang Technological University
Bachelor of Mechanical Engineering , Mechatronics and Robotics

Chiang Mai University

Chung-Ang University

Singapore Polytechnic
Diploma in Mechatronics and Robotics, Mechatronics, Robotics, and Automation Engineering
